Rabies vaccination administered Lot #856741, exp: 28JAN27
MC implanted #956000019950217

Spay scar seen on abdomen

The animal identified above was examined by a Department RVT and based on the presence of abdominal scar tissue or
other indicators of sterility, is believed to be sterilized.This certificate is issued for convenience of the adopting party and in the interest of not subjecting this animal to unnecessary
surgery. If this animal later proves to be unsterilized, please be advised you are required by state law to ensure the surgery is
performed. The Department will provide this service to you at its regular low-cost rate.

OK for adoption
