Implanted microchip # 956000019975983

Rabies- NOBIVAC/Lot# 856741 EXP 01/28/27

A: Animal was presented for surgery. On pre-surgical examination, animal was bright, alert, and responsive. Mucoid nasal discharge was seen around nostrils and dog was coughing/hacking. Condition may or may not be due to infection (Canine Respiratory Disease Complex aka Kennel cough).

P:

Pre-anesthetic: Acepromazine (2mg/ml) 0.8 cc IM, Butorphanol 10mg/ml: 0.9 cc IM,

Rx: Doxycycline 400 mg PO SID x 10 days

Azithromycin 250 mg PO SID x 7 days

Baytril Inj 100 mg/ml 1.75 ml IM

Reschedule sx

Adopt animal with Trust Deposit and Health Waiver. If animal's condition worsens or does not improve after 3 days of treatment, adopter needs to take animal to their veterinarian for appropriate care and diagnosis at their own expense. Adopter should call to schedule surgery after at least two weeks from recovery. Alteration surgery will be done only on animals free of any clinical symptoms.

Animal was not altered.
